PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in data analysis, large-scale data migration, and full-stack development (MERN). Currently a **Data Analyst & Developer at IIT Bombay Development & Relations Foundation**, building Python automation pipelines to validate, standardise, and migrate 100,000+ institutional records. Proficient in Python, SQL, JavaScript, and Google Workspace tools, with a strong record of turning ambiguous, large-scale data problems into reliable, repeatable solutions.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML5, CSS3, Java

Data & Analytics: Data Migration, Data Validation & QA, Fuzzy Matching, Data Standardisation, Deduplication, Excel-based Data Pipelines, Pandas

Frameworks & Libraries: React.js, Node.js, Express.js

Databases: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Google Workspace (Docs, Sheets, Drive), Postman, Vercel

WORK EXPERIENCE

Data Analyst & Developer | IIT Bombay Development & Relations Foundation (IITB-DRF) - Feb 2026 - Sept 2026 IT Ops

Department · On-site · Reporting to Internship Mentor, Sudarshan Chavan

- **Data Migration & Quality Assurance:** Led a large-scale alumni data-mapping and QA assignment, reviewing and validating approximately 710 records for completeness and consistency, identifying discrepancies, and correcting them to establish a clean foundation for downstream migration and automation.
- **Automation Development:** Built Python data-review and matching programs (fuzzy/exact logic across name, branch, programme, roll number, ID fields) that scaled from a 25-field pilot to a full 739-field validation pass, cutting manual review effort.
- **Large-Scale Data Standardisation & Deduplication:** Built a pipeline to normalise degree/department data across 100,000+ records and a high-performance deduplication program using pre-grouping and multiprocessing.
- **Identifier Mapping & Applied Analytics:** Built a program to cross-reference RE IDs with Almbase IDs, enriched the database via profile-data collection, and initiated a machine-learning model to recommend alumni for fundraising outreach.

Web Developer Intern | Edunet Foundation (AICTE & EY-GDS)

Feb 2025 – Mar 2025

- Developed a full-stack food delivery website using the MERN stack, strengthening understanding of scalable web architecture.
- Built and deployed RESTful APIs for authentication, order handling, and user management.

PROJECT WORK

- **Alumni Fundraising Prospect Intelligence Model:** Built a Python scoring model that recommends and ranks alumni for fundraising outreach using capacity, affinity and timing signals, with an interactive HTML dashboard.
- **Smart Budget:** Financial management tool to track income, expenses, and goals in real time, with a dynamic dashboard, CRUD operations via MongoDB & Express APIs, and a responsive React + Redux Toolkit front end.
- **LuxRide:** Built a website enabling users to buy or rent luxury vehicles including bikes, cars, and private jets.

EDUCATION

Bachelor of Science (B.Sc.) – Information Technology	Bunts Sangha's S.M. Shetty College of Science, Commerce and Management, Powai	2022 – 2025
Higher Secondary Certificate (XII)	National Education Society (NES) College of Science, Commerce and Arts, Mumbai	2020 – 2022
High School (X)	Kendriya Vidyalaya, IIT Bombay Powai, Mumbai	2019 – 2020

HOBBIES

Travelling · Photography · Playing Football
